**Metabolics and Ketogenic Product Update - Stock Situation Week Commencing 28<sup>th</sup> October 2024**

Dear Healthcare Professional,

Please see the latest list of Nutricia products that are either out of stock or are in short supply. This may therefore influence deliveries via Nutricia Homeward or to Hospitals via our wholesale chain. We apologise for any additional work this may be causing you and your teams, but we are working hard to resolve this situation. Our primary focus is ensuring patients get the protein substitutes they require.

**Please note:** where a product is stated to be out of stock, **patients may not be affected if they are holding stock at home**. If any action is required for a specific patient, the Nutricia Homeward team will contact you and **therefore proactive changes to regimens are not required**. To manage supply, we might deliver smaller quantities more frequently to patients. If a patient is concerned, please ask them to contact Nutricia Homeward directly.

**Key:**

**Red** – **Out of Stock** product – Our Homeward team will contact the managing Dietitian if action is required to change to an alternative. The date identifies when we anticipate the product is available via Homeward or will become available via our wholesalers for supply to hospital or community pharmacies.

**Orange** – The product has **low levels of stock**; orders can be fulfilled but if from Homeward, may arrive in split deliveries; the date is when we anticipate additional stocks will become available.

**Green** - **Sufficient stock** is available

We are currently facing long term challenges with supplying PKU GMPro Powder 33.3g and PKU Lophlex Sensation Berries 109g which we are working hard to resolve. Nutricia's Chef Derek have developed several alternative easy-to-prepare 'spoonable' recipes that we believe your patients will enjoy as temporary alternatives for PKU Lophlex Sensation Berries pot, which can be accessed [here](#). For information regarding Nutricia scoop chart, please refer to the website or the application [nutricia.co.uk](https://www.nutricia.co.uk)

We endeavour to keep you informed and apologise for the inconvenience that this may cause.

Yours faithfully,

**Anne O'Grady**

Medical Affairs and Metabolics and Ketogenics Category Director

\*TYR GMPro Mix-In is a Food for Special Medical Purposes for the dietary management of proven tyrosinaemia in children from 3 years and adults and must be used under medical supervision. 1 sachet of TYR GMPro Mix-In contains 18 mg phenylalanine (Phe) and 3.5 mg tyrosine (TYR). All products shown are Foods for Special Medical Purposes and must be used under medical supervision.
